## Warning: Mumbai air injurious to your health

**MUMBAI:** The city has seen a steady worsening of its air quality over the last few days, after the start of the fire at the Deonar dumping ground. Pollution levels remained at 'very poor' level with Friday being the worst. Moreover, against the expectations of experts of seeing an improvement. [Read More](#) (The Hindu | Feb 01, 2016)

## Delhi's air not worst in India: CPCB data

**NEW DELHI:** The capital lost a dubious crown on Friday with the country's pollution watchdog saying it is not India's most polluted city, perhaps not even the second worst. But Central Pollution Control Board's (CPCB) data for the September 2015-January 2016 period clearly shows that Delhi's air. [Read More](#) (Times of India | Feb 06, 2016)

## Make full use of wastewater

Summer is here and the scenario with the water storage in reservoirs is grim. It will be a tough ask to nurse them through to June when the rains are expected and that too only for drinking water. In such a water-scarce scenario, it is imperative we think of all forms of water. [Read More](#) (The Hindu | Feb 19, 2016)
